

EMBEDDED EXPERTISE

CREDIBLE CREATIVITY

An embedded system is much more than electronics and software. For us, embedded system development means taking care of the complete product: its performance, compatibility and value for the customer.

Our cross-disciplinary approach gives your product a real competitive advantage. That's credible creativity.

The leading design, project management and expert services specialist
for technology and engineering industries

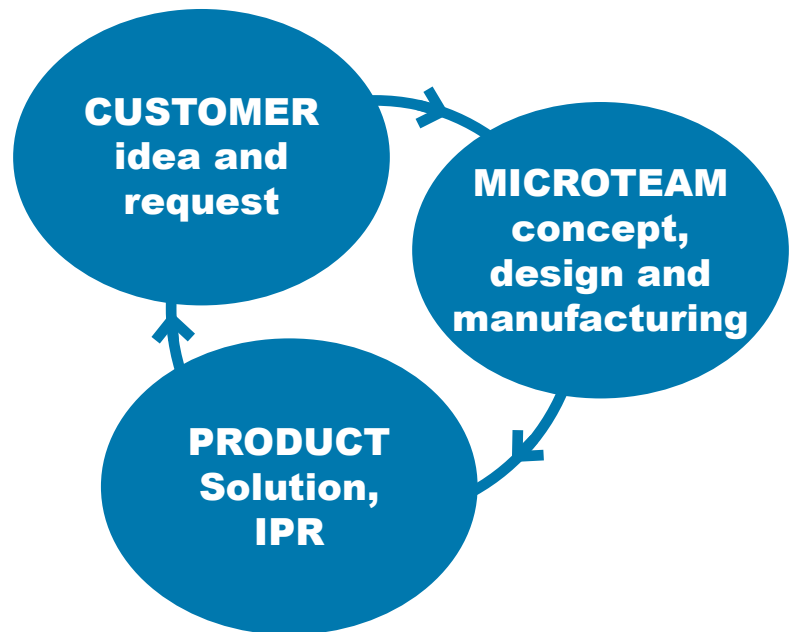

ADVANTAGES

Microteam has the ability of integrating technologies over industrial borders resulting in innovative solutions.

We are providing added value through deep knowledge and research in available technologies and physical phenomena.

Microteam guarantees the delivery from the early specification to final tests and production – with decades of experience in embedded systems.

Long term customer relations and mutual trust saves both time and money in R&D projects.

THIS IS WHY CHOOSE MICROTEAM AS A STRATEGIC PARTNER

Our promise

Microteam offers the most cost-effective, tailor-made embedded solutions.

Our experience in industrial, defence and automotive sectors gives us the tools for creating systems that employ the best practices from every area.

Expertise we have

Electronics
Embedded Software
Real-time Signal Processing
FPGA-based Solutions
Networked Systems & IoT
EMC & Signal Integrity
Automotive Electronics
Industrial & Military
Imaging & Machine Vision

Services we provide

Product Development
System Engineering
Engineering Consultancy
Design Reviews
Cloud & Hosted Services
OEM/ODM Manufacturing
EMC reviews
EMC problem solving
